

Protocol for Observation of a Research Lesson

1. Do not help students or otherwise interfere with the natural flow of the lesson.
2. Collect data as requested.
3. Use these points for areas to focus your data collection:
 - a. What did the student learn/achieve?
 - b. What did they come to understand?
 - c. What areas were challenging?
 - d. Were the objectives of the lesson met by the student?
4. Once you have identified the numbered student to which you have been assigned, follow that student throughout the lesson and collect data in reference to that student.
5. Collect any student work related to the lesson at the end of the lesson for further review.
6. Be respectful of the teaching and student learning. Please ensure that all cell phones and pagers are turned off. Please remain focused and refrain from talking to other observers.
7. Do not leave any trace of visitors behind. Please make sure you take all of your belongings when exiting the room.
